

Communication on Progress Report
UN GLOBAL COMPACT 2020

FOREWORD

Dear Reader,

The ALDI SOUTH Group has always prided itself in making quality products available to its customers at the right price. Through our new [Corporate Responsibility 2030 Vision](#) of “making sustainability affordable to our customers”, we will continue to give our customers access to great products, while reassuring them of the responsible sourcing of these products.

Whilst this is an ambitious goal, our new international CR Strategy shows that when organisations are faced with global challenges, they need to take a global perspective. We focus on four international areas: respecting human rights, improving resource efficiency, realising zero carbon and being an employer of choice, and combine them with national activities to meet our customers’ everyday needs and support local communities.

In 2017, the ALDI SOUTH Group joined the United Nations Global Compact (UNGC) and we continue to be committed to supporting the ten UNGC Principles in the key areas of human rights, labour, environment and anti-corruption.

Our 2020 report clearly demonstrates that we are on the right track to create positive progress and are implementing necessary measures to tackle global challenges. However, there is still much to be done and we believe that every day we are setting the stage for long-term success.

I hope you find this report enjoyable,

Anke Ehlers

Managing Director Corporate Responsibility International (CRI) on behalf of the national organisations of the ALDI SOUTH Group

“ **ALDI contributes to the democratisation of sustainable products by making them affordable and bringing them into any household and onto everybody’s plate.** ”
